At the request of the Barnstable Town Assessor the Tax Classification Public hearing was continued to a future date after the Town of Barnstable assessments are approved by the DOR.

The bid request for the space assessment is completed and ready to send out. Mr. Goldstein is gathering names of architects to submit the bid request to.

The mouse and termite traps have been completed at Freedom Hall. The alarm system was not working properly last week and the cause was some wires that had been chewed by mice. During the inspection by the alarm company it was discovered the radio transmitter component of the system was not working and was replaced.

Prior to the meeting Fran met with the contractor in charge of the LaPoint construction. The plan is to replace a five foot strip of asphalt that abuts the property that is cracked. They will be installing a five foot solid fence with low plantings that will be all on the LaPoint property. It is not clear if they will include a gate in the fence to provide access to the district's parking lot. Fran reminded Mr. Cataldo that the lot is for public use not for private homeowner parking.
